ajuste libre: $n = 2.036 \pm 0.010$
pendiente -2 (misma normalización en E_0)
pivote $E_0 = 4.206$ GeV
BESIII, baja lum. (104)
BESIII, alta lum. (29)
banda $\pm 1\sigma$ del ajuste (covarianza completa n–log k)
modelo completo de BESIII (Sol. I), ver panel inferior
σ [nb]
$\sigma/\sigma_{\text{ajuste}} - 1$ [%]
E_{cm} [GeV] (escala logarítmica)
